Problem – Solution Fit Template

The **Problem–Solution Fit** means identifying the problems faced by users while booking sports facilities and ensuring that the **Sports Hall Booking System** provides an effective solution. The system helps students, staff, sports coordinators, and administrators book sports halls easily, avoid scheduling conflicts, and improve the overall booking experience.

Purpose

- Solve the problem of manual sports hall booking by providing a simple and user-friendly online booking system.
- Increase booking efficiency through real-time availability, instant confirmation, and automated scheduling.
- Improve communication by sending booking confirmations, reminders, cancellations, and notifications to users.
- Build trust by eliminating double bookings, reducing waiting time, and ensuring transparent booking management.
- Understand the current booking process and improve it with a centralized, secure, and automated Sports Hall Booking System.

Template:

PROBLEM	1. EXISTING PROBLEMS 01 - What are the main problems your customers face? - List their top 3–5 problems. - How do these problems affect them daily? - What are the consequences of not solving them?	2. UNDERLYING REASONS 02 - What causes these problems? - What are the root causes? - Is it a process issue, technology issue, or awareness issue? - Why haven't they been solved already?	3. IDEAL USER / TARGET GROUP 03 - Who are your target users? - What are their roles or responsibilities? - What are their goals and expectations? - What challenges do they face regularly?
	4. IMPACT OF THE PROBLEM 04 - How does the problem impact the user? - What are the time, cost or resource losses? - How does it affect their productivity or satisfaction? - What risks are involved?	5. PROBLEM NOT SOLVED 05 - What happens if the problem remains unsolved? - What are the long-term effects on the user or organization? - Have users tried any workaround solutions? - Why are current solutions not effective?	6. KEY INSIGHT 06 - What is the most critical problem to solve? - What do users really want? - What have you learned from user feedback or research? - What insight helped you understand the problem better?
CUSTOMER	7. SOLUTION 07 - What is your proposed solution? - How does it address the identified problem? - What are the key features or functionalities? - How is it different from existing solutions?	8. UNIQUE VALUE 08 - What value does your solution provide to the user? - How does it save time, cost or effort? - What makes your solution easy to use and effective? - How will it improve their overall experience?	9. COMPETITIVE ADVANTAGE 09 - What makes your solution better than others? - Do you have any unique technology, design or process? - Why will users choose your solution? - What is your unfair advantage in the market?
	10. PROBLEM–SOLUTION FIT 10 - How well does your solution solve the problem? - Does it meet the real needs of the users? - Have users validated your solution? - What feedback have you received so far?	11. MEASURABLE IMPACT 11 - How will you measure the success of your solution? - What KPIs or metrics will you track? - What improvement or change will users see? - How will it create long-term value?	12. CONTINUOUS IMPROVEMENT 12 - How will you improve your solution over time? - What user feedback will you collect? - How will you adapt to changing user needs? - What future enhancements are planned?
