

Project Design Phase

Project Name	Sports Hall Booking System
Team ID	
Maximum Marks	2 Marks

Proposed Solution Template

S.No	Parameter	Description
1	Problem Statement (Problem to be solved)	Many educational institutions and sports centers still manage sports hall bookings manually using registers, phone calls, or spreadsheets. This leads to double bookings, scheduling conflicts, delays, lack of transparency, and inefficient utilization of sports facilities.
2	Idea / Solution Description	Our solution is a Sports Hall Booking System developed using ServiceNow Studio . Students, faculty, and staff can book sports halls online, check real-time availability, receive booking confirmations, and manage cancellations. Administrators can approve requests, monitor bookings, and generate reports through an automated workflow.
3	Novelty / Uniqueness	The uniqueness of our project is that it provides a centralized platform for sports hall management with real-time booking availability, automated approval workflows, instant notifications, and conflict-free scheduling, making the booking process faster, more reliable, and user-friendly.
4	Social Impact / Customer Satisfaction	The system improves user satisfaction by providing quick and convenient online booking, reducing waiting time, preventing booking conflicts, ensuring fair access to sports facilities, and enhancing the overall sports experience for students and staff.
5	Business Model (Revenue Model)	The solution can be offered as a Software-as-a-Service (SaaS) application for schools, colleges, universities, sports academies, and fitness centers. Organizations can subscribe to the platform to automate sports facility management and improve operational efficiency.

6	Scalability of the Solution	The system is highly scalable and can be extended to manage multiple sports halls, stadiums, gyms, swimming pools, indoor courts, tournaments, equipment reservations, payment integration, mobile applications, and analytics dashboards.
